STAT MEMORANDUM FOR: [redacted]
Coordinator, Exceptional Intelligence Analyst Program

STAT FROM: [redacted]
Acting Director, Plans and Policy Staff, ICS

Subject: Exceptional Intelligence Analyst Program

1. I have reviewed the application of Major Frank L. Wyman, USA to participate in the Exceptional Intelligence Analyst Program, and believe that the proposal has merit. Major Wyman appears to possess the necessary credentials to conduct a study of the type outlined in his proposal, and appears to have a clear understanding of the purpose and scope of his program.

2. My only reservation about the proposal concerns the resultant product as outlined in the fourth bullet in Section 3. The proposed product, "a study that will assess future policies of the North African countries," is much broader in scope than "the role of the military and their effects on the Governments of Algeria, Tunsia and Morrocco," as outlined in Section 2. You may wish to have Major Wyman redefine the resultant product description to more accurately reflect the focus of his proposed study.

3. I recommend that we approve this proposed course of study.
